

**IN THE SPECIFICATION**

Please amend the specification as follows, with all references to the herein submitted English-language translation of the international patent application.

Page 2, amend lines 7-26 as follows:

~~A mail delivery service in the cellular phone service has an advantage that a mail sent from the other end can be immediately received by the user's own cellular phone terminal. In other words, a personal computer not in constant connection has a disadvantage that whether a mail has been sent from the other end is not recognized unless otherwise the computer runs mail software and then accesses the mail server to receive the mail. In contrast, the mail delivery service in the cellular phone service has immediacy in data transmission by mail and increases in frequency of use.~~

~~In addition, if the mail delivery cannot be performed because the cellular phone of the cellular phone terminal at the other end is without its service area or the like, sending is tried again by a sending program after a lapse of a predetermined period. Thereafter, this operation is repeated a plurality of times until sending is realized. Further, in addition to the sending of mail performed by the sending program, it is also possible that the user accesses the mail server to receive the mail to the user stored in the mail server.~~

~~Incidentally, a cellular phone operator side serving as a provider for cellular phones mainly provides the mail sending/receiving service to allow mails to be sent/received also to/from other cellular phone operators and general Internet service providers.~~

Page 4, amend the heading on line 11 as follows:

~~DISCLOSURE~~ SUMMARY OF THE INVENTION

Page 23, after the heading “BRIEF DESCRIPTION OF THE DRAWINGS” on line 21, add the following paragraph:

The following detailed description, given by way of example and not intended to limit the present invention solely thereto, will best be appreciated in conjunction with the accompanying drawings, wherein like reference numerals denote like elements and parts, in which:

Page 13, amend the heading on line 1 as follows:

~~BEST MODE FOR CARRYING OUT~~ DETAILED DESCRIPTION OF THE  
INVENTION

Page 43, after line 10, add the following paragraph:

While the present invention has been particularly shown and described in conjunction with a preferred embodiment thereof, it will be readily appreciated by those of ordinary skill in the art that various changes may be made without departing from the spirit and scope of the

invention. Therefore, it is intended that the appended claims be interpreted as including the embodiments described herein, the alternatives mentioned above, and all equivalents thereto.
